RE: Site Visit, Drum and Alto-Ibex Sites, Jumbo Mining,  
M/027/007 and M/023/013, Millard and Juab Counties, Utah

On July 13, 1989, James Leatherwood, Henry Sauer, and I visited the Drum and Alto-Ibex sites. The purpose of the visit was to collect and evaluate soil samples on the waste material at each of these sites.

A composite sample was collected from the slope of waste dump W-5, and the southwest side. The material was predominantly composed of pulverized mine wastes. Pictures were taken of the sample site and will be inserted in the file once processed. The evaluation of this sample is not yet complete.

A composite sample was also collected at the top of the proposed Alto pit area. Photos have been taken of the sample site. Results from a soil analysis have not yet been complete. The material collected appears predominantly rhyolitic in nature so will probably prove to be fairly inert.

The Division had earlier committed to Jumbo Mining to collect samples at the Alto-Ibex site. The samples are to be evaluated for any toxic qualities, and nutrient content.

Mr. Ed King, President of Jumbo Mining was on site at the time of our visit. We stopped and conversed briefly with Mr. King then went on to tour the site and collect samples.

The two large process ponds, each 100 feet square, have not yet been fenced to keep out wildlife. This was something which was requested in our last permit review correspondence with the operator.

RE: Request for Board Concurrence, Amount and Form of Reclamation Surety and Permit Transfer, Drum Mine, Jumbo Mining Company/Western States Minerals Corporation, M/027/007, Millard County, Utah

Attached for your information are copies of an updated reclamation surety estimate, the proposed Reclamation Contract (Form MR-RC), the amount and proposed form of reclamation surety and the permit transfer document (Form MR-TRL) for Jumbo Mining Company's (Jumbo), Drum Mine, located in Millard and Juab Counties, Utah.

Jumbo Mining Company has purchased the Drum Mine property from Western States Minerals Corporation (WSMC). A revised reclamation surety estimate of \$162,000 has been calculated by the Division to cover the projected costs to reclaim the minesite (in 1994 dollars) disturbances.

The proposed form of surety will be United States Treasury Bills which will be held in the name of the State of Utah, Division of Oil, Gas and Mining, and the U.S. Department of the Interior, Bureau of Land Management. Securities transactions will be handled by and processed through the Utah State Treasurer's office.

The revised reclamation surety also includes the projected reclamation costs for additional proposed surface disturbance (approximately 11 acres - \$19,000) associated with a recent Drum Mine permit amendment filed by Jumbo.

Upon the Board's acceptance of the amount and form of the revised reclamation surety, the Division will issue written approval for the permit transfer between Jumbo and WSMC, and the permit amendment.

Attention: Mr. Lowell Braxton

Gentlemen:

Enclosed please find a draft of the Reclamation Contract (Form MR-RC) which we propose to submit. We have not included pages 3-8 because there is no additional data that needs to be entered.

We are also enclosing a pledge plan developed by Texas Commerce Bank-Austin, which fulfills your requirements of posting of surety relative to the reclamation bond, as discussed this date with Mr. Holland Sheppard.

If you have any questions or comments, please call me at phone 512-346-4537.

Very truly yours,

  
Janet King  
Vice President
